L'histoire écrite par le vaincu

L'essentiel en bref

Il s'agit d'une synthèse présentant la structure générale de la *Luftwaffe*. L'organisation du système de grade représente à lui seul la complexité de l'ensemble et laisse donc entrevoir la vision générale que pouvaient en avoir les organisateurs de cette mythique force aérienne. Enfin, il s'agit d'expliquer conjointement des concepts ou des considérations basiques principalement destinées au lecteur qui ne serait pas familiarisé avec l'organisation militaire en général.

Près de 3000 illustrations représentent pratiquement chaque grade en usage dans toutes les organisations supervisées par le *Reiches Luftfahrt Ministerium (RLM)* et la *Wehrmachts Luftwaffe (Lw ou WL)* dans son ensemble. Actuellement, il s'agit de l'ouvrage plus complet réalisé sur le sujet. Les dessins de grades sont volontairement généreusement dimensionnés pour en apprécier tous les détails graphiques.

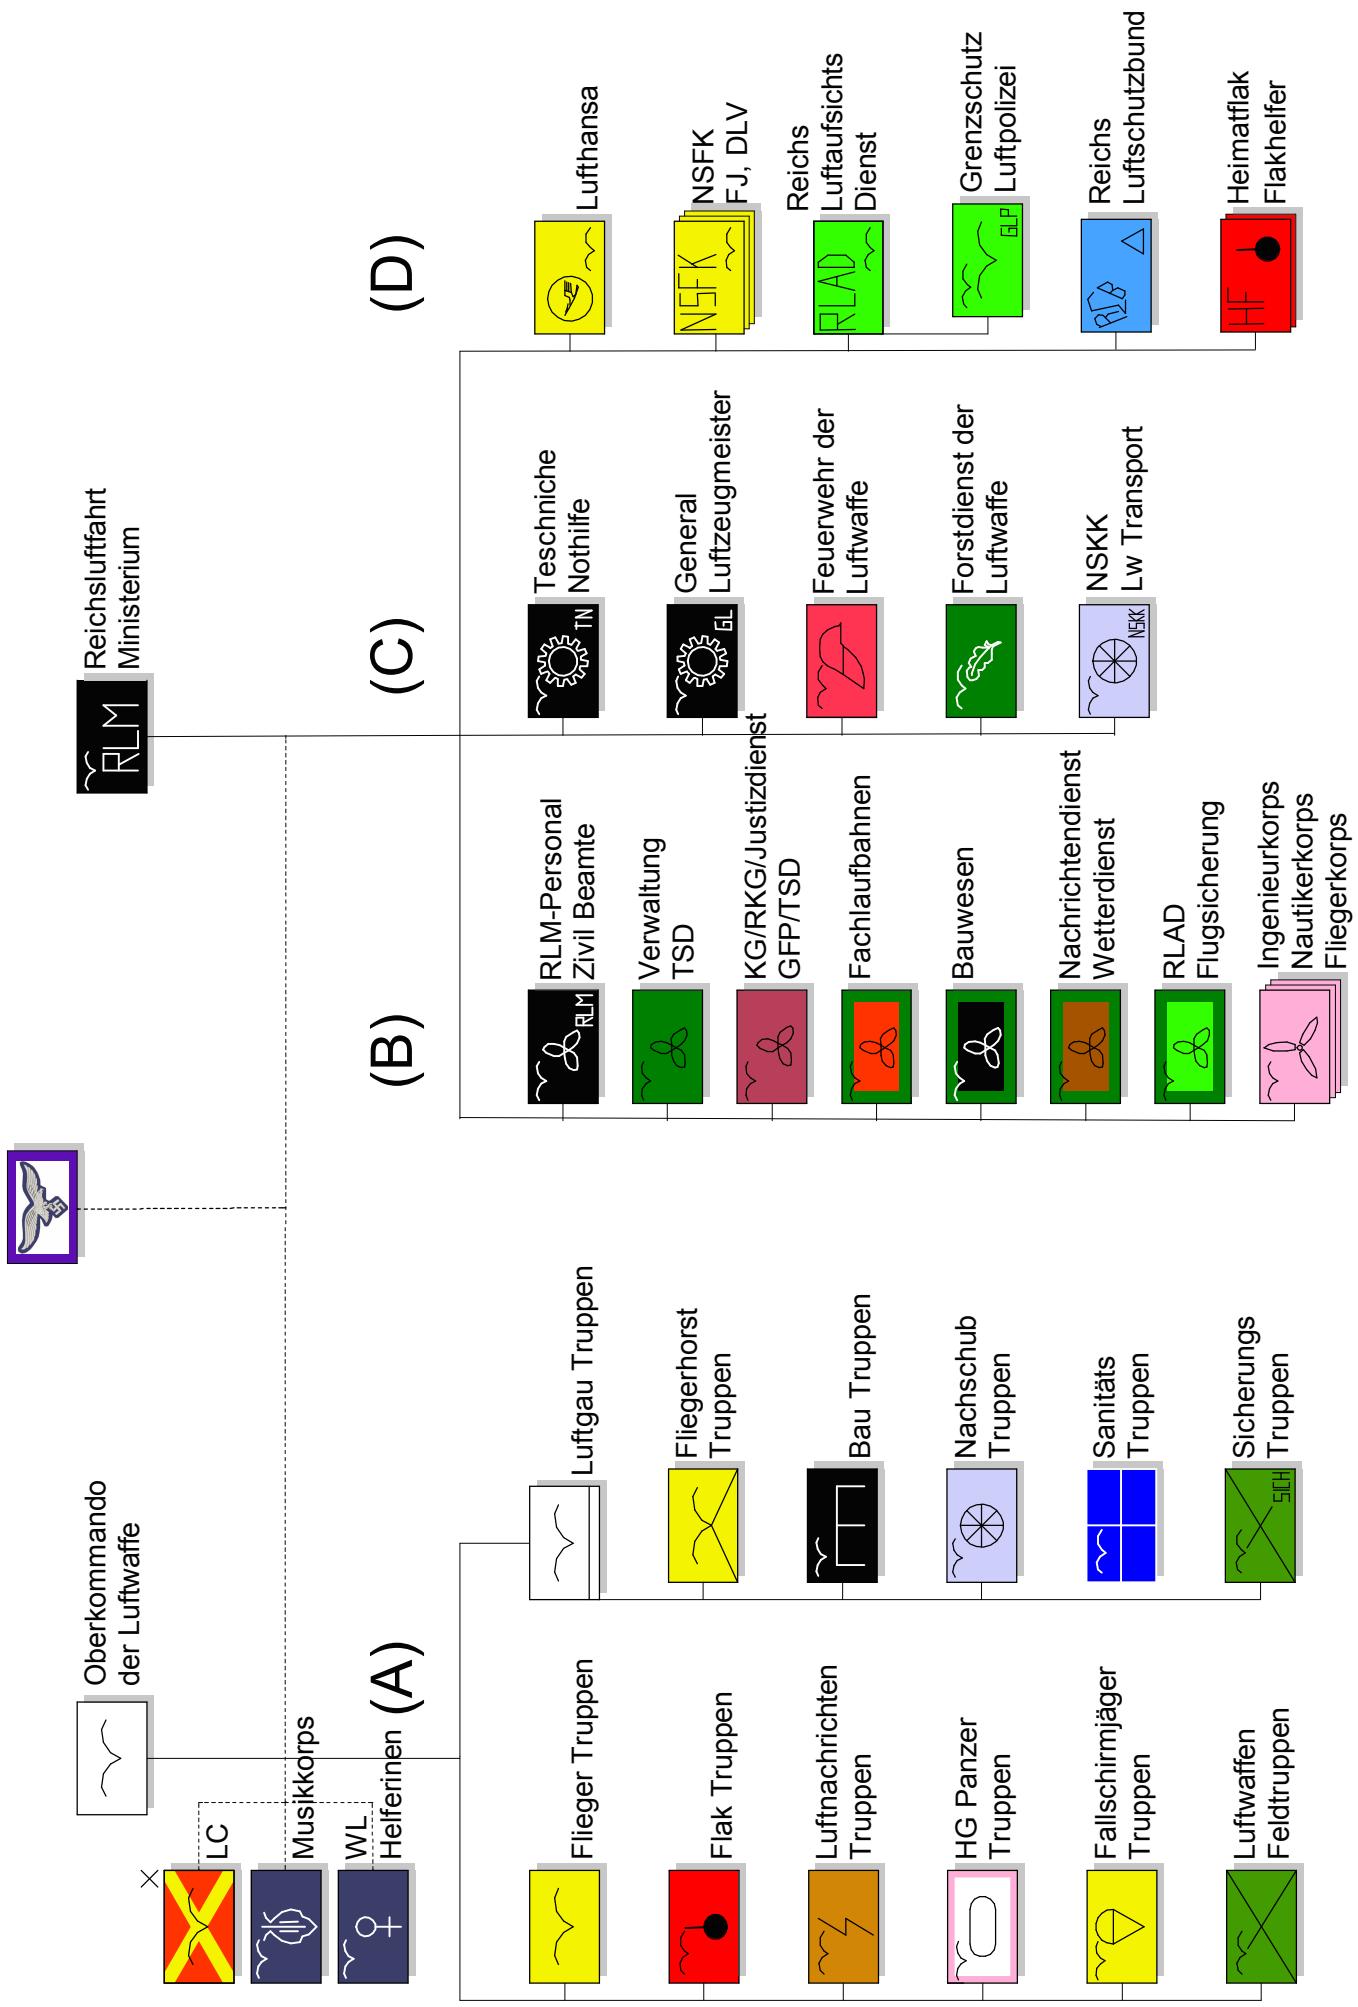

Ce livre est rédigé en français mais les planches couleur sont intégralement sous-titrées en allemand. Les titres sont également traduits en allemand dans le corps du texte pour permettre au lecteur germanophone d'utiliser cet ouvrage à titre de référence.

Das Wesentliche in Kürze

Dies ist eine Zusammenfassung der allgemeinen Struktur der Luftwaffe. Allein die Organisation des Rangsystems stellt die Komplexität des Ganzen dar und lässt auf die allgemeine Vision schließen, die die Organisatoren von dieser mythischen Luftwaffe haben konnten. Schließlich geht es darum, Konzepte oder grundlegende Überlegungen zu erläutern, die hauptsächlich für den Leser gedacht sind, der mit der militärischen Organisation im Allgemeinen nicht vertraut wären.

Über 3000 Abbildungen repräsentieren praktisch alle Grade, die in allen vom Reichs Luftfahrt Ministerium (RLM) beaufsichtigten Organisationen verwendet werden, einschließlich der gesamten Deutschen Luftwaffe. Derzeit ist es das umfassendste Buch zu diesem Thema. Die Notenzeichnungen sind freiwillig großzügig bemessen, um alle grafischen Details zu erkennen.

Dieses Buch ist in französischer Sprache verfasst, aber die Farbtafeln sind vollständig in deutscher Sprache. Titel werden auch im Textkörper ins Deutsche übersetzt, damit der deutschsprachige Leser dieses Buches auch als Referenz verwenden kann.
